16. All competitors are to be notified at least 10 days prior to trial of their report times, and subsequently confirmed in writing, except when the report times have already been given in the schedule.

For the T.D. Stake a draw for the competitors' report groups must be made by the I.K.C. The Irish Kennel Club CLG., shall take into account the following points, which will be notified to them by the host society.

- b) A handler working more than one dog in the T.D. Stake to work all their dogs on the same day. Consideration to be given to the timing of the draw/working the dogs to avoid consecutive working of the dogs.
- c) The host club to advise the Irish Kennel Club CLG., of the day/days that handlers are available to work their dog/dogs. The draw to take this into account. In the event of the numbers of competitors requesting to work on a specific day exceeding the number of tracks available, then the Irish Kennel Club CLG., to conduct a full draw of all T.D. competitors and they may then be drawn to work over any of the days available. - if 5 competitors, in groups of 2 and 3
- if 4 competitors or less, in 1 group

A further draw for tracking times will then take place at the Trials Base not more than 45 minutes before the first track in each group is to be worked. Any alterations to the above method of TD report times must be authorised by the Irish Kennel Club CLG., prior to the society notifying competitors.

In the case of cancellations after the Irish Kennel Club CLG., draw has taken place, the Trials Manager shall ensure that the competitors still report in groups that conform to the ones set out above while still remaining in the original order drawn by the Irish Kennel Club CLG.

If the trials manager sees in advance that a competitor could have two dogs tracking one after another due to four dogs or less competing or by having a dog in two consecutive draws, the trials manager must use his/her discretion by allowing extra time between tracks if there are only three or four dogs competing, or between groups of tracks if there is to be more than one draw.

APPENDIX NO.2

DESCRIPTION OF EXERCISES AND GUIDANCE FOR JUDGES AND COMPETITORS AT WORKING TRIALS

A. **Method of Handling**

Although implicit obedience to all orders is necessary, dogs and handlers must operate in as free and natural a manner as possible. Excessive formalism may be penalised, particularly if, in the opinion of the Judge, it detracts from the ability of the dog to exercise its senses in relation to all that is happening in the vicinity. Persistent barking, whining etc., in any exercise other than location of article, person or speak on command should be penalised. Food may not be given to the dog by the handler whilst being tested. The dogs name may be used simultaneously with command or signal without penalty.

Food may not be carried or given to the dog on the competition field. Any other article carried by the handler is subject to the judges' discretion and must be indicated to the judge prior to the commencement of the test. Food must not be left in the vicinity of the working area of the trial where it is likely to affect another competitors' chance of qualifying or winning.

All competitors must show respect for the judge. Training rounds will only be allowed if prior permission has been given by the judge.

B. **Heelwork**

The Judge shall test the ability of the dog to keep his shoulder reasonably close to the left knee of the handler who should walk smartly in a natural manner at normal, fast and slow paces through turns and among and around persons and obstacles. The halt, with the dog sitting to heel and a 'figure of eight' may be included at any stage.

Any act, signal or command or jerking of the leash which in the opinion of the Judge has given the dog extra assistance must be penalised.

C. **Sit (2 Minutes)**

Dogs may be tested individually or in a group or groups. The Judge or Steward will give the command 'Last Command' and handlers should then instantly give their final commands to the dogs. Any further commands or signals will be penalised. Handlers will then be instructed to leave their dogs and proceed to positions indicated by the Judge or Steward until ordered to return to them. Where possible, such positions should be out of sight of the dogs but bearing in mind the short duration of the exercise this may not be practical. Dogs must remain in the sit position throughout the test until the Judge or Steward indicates that the test has finished. Minor movements must be penalised and no marks will be awarded to any dog which stands, lies down or crawls. The Judge may use his discretion should interference by another dog cause a dog to move.

D. **Down (10 Minutes)**

Handlers must be out of sight of the dogs who may be tested individually or in a group or groups. The Judge or Steward will give the command 'Last Command' and handlers should then instantly give their final commands to their dogs. Any further commands or signals to the dogs will be penalised. Handlers will then be instructed to leave their dogs and proceed to positions indicated by the Judge or Steward until ordered to return to them. Dogs must remain in the 'down' position throughout the test until the Judge or Steward indicates that the test has finished. Minor movements must be penalised and no dog will be awarded any marks that sits, stands or crawls more than its approximate body length in any direction. The Judge may use his discretion should interference by another dog cause a dog to move. The Judge may test the dogs by using distractions but may not call it by name.

E. **Recall to Handler**

The dog should be recalled from the 'down' or 'sit' position, the handler being a reasonable distance from the dog at the discretion of the Judge. The dog should return at a smart pace and sit in front of the handler, afterwards going smartly to heel on command or signal. Handler to await command of Judge or Steward.

F. **Retrieve a Dumb-Bell**

The dog should not move forward to retrieve nor deliver to hand on return until ordered by the handler on the Judge or Steward's instructions. The retrieve should be executed at a smart pace without mouthing or playing with the object. After delivery the handler will send his dog to heel on the instructions of the Judge or Steward.

G. **Sendaway and Directional Control**

The distance that the Judge shall set for the Sendaway shall be 20 yards to 50 yards for the C.D. Stake, 50 yards to 100 yards for the U.D. Stake, and a minimum of 50 yards for all other stakes. The T.D. Stake shall also include a redirection of a minimum of 50 yards. When the dog has reached the designated point or the Judge is satisfied that after a reasonable time the handler cannot improve the position of the dog by any further commands the dog should be stopped in either the stand, sit or down position at the discretion of the handler. At this point in the T.D. Stake the Judge or Steward shall instruct the handler to redirect his dog. In all Stakes, whilst the Judge should take into account the number of commands used during the exercise, importance should be placed upon the handler's ability to direct his dog to the place indicated.

H. **Speak on Command**

The Judge will control the position of the handler in relation to the dog and may require the handler to work the dog walking at heel. If the dog is not required to walk at heel, the handler may at his discretion place the dog in the stand, sit or down position. The dog will be ordered to speak and cease speaking on command of the Judge or Steward who may then instruct the handler to make the dog speak again. Speaking should be sustained by the dog whilst required with the minimum of commands and/or signals. Continuous and/or excessive incitements to speak shall be severely penalised. This test should not be incorporated with any other test.

I. **Agility**

No part of the Scale or Clear or Long Jump equipment to be traversed by a dog shall be less than three feet wide nor be in any way injurious to the dog. The tests shall be followed in a sequence agreed by the Judge and will commence with the Clear Jump. The Scale should be a vertical wall of wooden planks which may be chamfered along their bottom edge on both sides in the top half of the Scale. The top surface of the Scale may be lightly padded. The handler and dog should approach the Scale at a walking pace with the dog at heel. At the handler's discretion and in his own time whilst the dog and handler are in a stationary position and the dog's front feet are within the clearly defined 2.73m (9 Ft) marker/s the dog should be ordered to scale. On reaching the other side the dog should be ordered to stay in the stand, sit or down position, the handler having previously nominated such a position to the Judge. The Judge should ensure that the dog will stay steady and may indicate to the handler where he should stand in relation to his dog and the Scale before ordering the dog to be recalled over the Scale. A dog which fails to go over the Scale at the second attempt shall be excluded from the stay and recall over the Scale. Failure in the recall over the Scale does not disqualify from marks previously gained.

The handler may either approach the clear and long jumps with the dog or send it forward or stand by the jumps and call the dog up to jump. At no time should the handler proceed beyond any part of the jumps before they have been traversed by the dog. Once the dog has cleared the obstacle he should remain on the other side under control until joined by the handler. The clear jump should be so constructed that it will be obvious if the dog has exerted more than slight pressure upon it. The rigid top bar may be fixed or rest in cups and the space below may be filled in but the filling should not project above the bottom of the top bar. If the bar stays in position the dog shall be considered to have cleared the jump.

The construction of the Long Jump shall be as follows: The front element to be a minimum of 90cm (3ft.) wide graduating over five elements (four for small dogs) to a back element of a minimum width of 112cm (3ft.8ins.). The front edge of the front element to be 10cm (4ins.) high rising to 17.5cm (7ins.) at the back edge. Each element thereafter graduating in height by 1in (2½cm)-the back of the last element begin 27.9cm (11ins.) high. The minimum width (front to back) of each element to be at least 15cm (6ins.) and clearly visible to the dog.

Failure or refusal at any of the three types of jump may be followed by a second attempt and any one such failure shall be penalised by at least 50% of the marks allotted to that part of the exercise in which the dog is given a second attempt.

Jumping heights and lengths: T.D. stakes: scale: 180cm (6ft.) clear jump: 90cm (3ft.) long jump: 270cm (9ft.)

J. **Search**

In the Companion Dog (C.D.) Stake the Search shall contain three articles and in all other Stakes shall contain four articles. In all Stakes fresh articles must be placed for each dog who must recover a minimum of two to qualify. As a guide the articles should be similar in size to a 15cm (6ins.) nail or a match box, but the Judge should choose articles in relation to the nature of the ground and the Stake which he is judging. The time allotted shall be four minutes in the C.D. Stake and five minutes in all other Stakes. The articles should be well handled and placed by a Steward who shall foil the ground by walking in varying

directions over the areas. Each competitor shall have a separate unused piece of land.

The C.D. Stake Search area shall be 13.5m (15 yards) square, all other Stakes being 22.5m (25 yards) square and shall be clearly defined by a marker peg at each corner. The handler may work his dog from any position outside the area, provided that he does not enter it.

In the C.D. Stake a maximum of five marks should be allotted for each article and a maximum of five marks for style and control. In all other Stakes a maximum of seven marks should be allotted for each article and a maximum of seven marks for style and control.

K. Track

The track should be plotted on the ground to be used for the nosework by Stewards previous to the day of commencement of the Trials. An area of ground which has had a track laid over it must not have another track laid over it until the following day. The track shall be single line and may include turns. The articles should be in keeping with the nature of the ground. There shall be a marker left by the track layer to indicate the start of the track. In the U.D. Stake a second marker should be left no more than 27m (30 yards) from the start to indicate the direction of the first leg.

Unless the Judge considers the dog to have lost the track beyond recovery or to have run out of the time allotted for the completion of the track a handler may recast his dog at his discretion. The Judge should not at any time indicate to the handler where he should recast his dog save in exceptional circumstances.

The track shall be approximately half a mile long. The track should be laid as far as possible by a tracklayer who does not know in advance for whom the track is being laid. The article(s) should be well scented. When the Judging is in progress the tracklayer shall be present at the side of the Judge to indicate the exact line of the track and the position of the articles.

The U.D. Stake track shall be not less than half an hour old and should include two articles, one of which should be placed on the first half of the track. At least one article must be recovered to qualify.

The W.D. Stake track shall be not less than one and a half hours old and shall include two articles one of which must be recovered to qualify.

The T.D. Stake track shall be not less than three hours old and shall include three articles two of which must be recovered to qualify.

In all Stakes the last article shall indicate the end of the track. No two articles should be laid together.

A spare track additional to requirements should be laid out but the opportunity to run a new track should be given only in exceptional circumstances.
